PROFESSIONAL SUMMARY

Analytical and systems-focused professional with experience across technology operations, data analysis, KPI reporting, SAP business processes, stakeholder engagement, and process improvement within Dublin Bus. Skilled in SQL, Power BI, SAP ERP, data modelling, business process documentation, and operational reporting, with hands-on experience supporting enterprise systems, virtual server environments, technical troubleshooting, and technology improvement initiatives. Combines operational knowledge with technical expertise and a proactive approach to emerging technologies to deliver data-driven insights, process improvements, and business support solutions.

CORE SKILLS

- **Data & BI:** SQL (joins, CTEs, window functions) · Power BI (DAX, data modelling, dashboards) · Qlik · Excel · KPI & operational reporting · exploratory data analysis
- **Business Analysis:** requirements gathering & documentation · process mapping (as-is/to-be, BPMN) · user stories & acceptance criteria · gap, impact & root cause analysis · stakeholder engagement
- **Systems & Delivery:** SAP ERP (MIGO, ML81N) · system rollout & change support · audit & compliance documentation · cross-functional collaboration
- **Technology & Innovation:** Microsoft Copilot · AI-assisted research and documentation · digital workflow optimisation

PORTFOLIO PROJECTS — IDRISABA.GITHUB.IO

- **Clontarf Depot Operational Performance & Compliance Monitoring** — End-to-end Business Systems Analysis case study featuring stakeholder analysis, requirements gathering, process mapping, business rules, user stories, SQL analytics, and Power BI dashboard development.
- **AdventureWorks Sales & Business Performance Analytics** — SQL and Power BI project involving data modelling, KPI reporting, trend analysis, customer segmentation, and business performance dashboard creation.

PROFESSIONAL EXPERIENCE

Clerical Officer (Technology Development Department) *Jul 2024 – Present*

Dublin Bus, Dublin, Ireland

- Support technology operations, KPI reporting, data analysis, and business systems activities within Dublin Bus Technology Development, collaborating with operational and technical stakeholders to improve data quality, reporting, and system performance.
- Supported KPI reporting by extracting, validating, and analysing operational datasets to monitor system performance and equipment status.
- Queried and analysed datasets using SQL and Excel to investigate issues, validate records, and improve data accuracy.
- Conducted data reconciliation activities to ensure consistency and integrity across operational and system records.
- Created and maintained Power BI data models using fact and dimension table relationships to support reporting accuracy and dashboard performance.
- Developed and maintained Power BI dashboards visualising KPI performance, operational trends, and service metrics for business stakeholders.
- Produced weekly and monthly KPI reports to support operational decision-making and identify performance improvement opportunities.
- Developed process maps, workflow diagrams, operational procedures, and user guidance documentation to support system improvements and business process understanding.

- Monitored applications and virtual server environments, identifying and escalating issues impacting operational workflows.
- Executed periodic patching of virtual server environments to maintain system integrity and support compliance requirements.
- Collaborated with technical and operational teams to support system updates, testing activities, and business-led technology initiatives.

Clerical Officer (Reporting & Operational Support) *Apr 2019 – Jun 2024*

Dublin Bus, Dublin, Ireland

- Provided administrative support to the Clerical Supervisor, Depot Administrator, and Area Operations Manager to support the safe and efficient operation of the depot.
- Assisted in the implementation of Dublin Bus policies, procedures, and operational action plans.
- Ensured compliance with Data Protection, Quality, Environmental, Health & Safety, and company governance requirements.
- Maintained effective working relationships with employees, Trade Unions, internal departments, CIE Group companies, and external stakeholders.
- Conducted cash handling, reconciliation, and lodgement activities in accordance with established security procedures.
- Managed complaints administration and supported operational investigations.
- Processed invoices, generated transaction references, and maintained financial records using SAP.
- Conducted daily payroll audits using Microbus, validating operational and payroll data for accuracy and compliance.
- Produced and analysed daily depot KPI reports using Mobile Statistics, monitoring route timing performance and operational efficiency.
- Responded to telephone queries, correspondence, and general administrative requests to support day-to-day depot operations.

Sales Promoter *Oct 2018 – Mar 2019*

DoDublin, Dublin, Ireland

- Delivered customer-facing sales and service support within a high-volume transport environment, promoting Dublin Bus products and services to domestic and international customers.
- Identified customer requirements and recommended appropriate products and ticketing solutions.
- Developed product knowledge and maintained awareness of market offerings and customer trends.
- Supported brand promotion initiatives and customer engagement activities, particularly within Dublin Airport operations.
- Resolved customer queries and complaints professionally, maintaining a positive customer experience.
- Built strong communication, stakeholder engagement, and problem-solving skills while working in a fast-paced operational environment.

Service Desk Analyst *Nov 2016 – Oct 2018*

JD Sports, Dublin, Ireland

- Provided technical and operational support to service users, maintaining continuity of business-critical applications and services.
- Supported regulatory and compliance processes by maintaining accurate operational and licensing records.
- Improved operational efficiency through structured administration, record management, and support of service desk processes within a fast-paced retail environment.
